AB	The union-type restriction orifice (UTRO) is formed by arranging a plate member having a hole of prescribed size in the flow path of a union screw or union collar. The filtration app. includes the UTRO for joining 2 pipes to flow a gas or liq., and uniformly distribute the gas or liq. The UTRO is used for uniformly supplying of air (air bubbling) to remove accumulated suspended substances on filtration membranes. The filtration app. can be used for purifn. of water, e.g., lake water, groundwater, seawater, etc.
